

- ▶ Meet regulatory and reporting needs
- ▶ Prepare your data for future services growth
- ▶ Align processes and procedures

---

#### Considerations:

- Do you trust your data?
  - Are you finding data errors or missing data in your regulatory reporting?
  - Are you ready to transition your data to BI Analytics?
- 

Data consistency is a key component to successfully meeting regulatory and reporting requirements. Is your data able to meet requirements for IFRS9?

Your business process and procedures are vitally important to how your data is added and maintained in your DNA database. Ensure your data is trustworthy and ready for future services growth.

Celero consultants use developed best practices to improve and maximize your business processes to ensure your data is available, correct, and reliable for any reporting or regulatory requirements.

#### Virtual Classroom

Celero consultants ensure staff have the knowledge required to improve business processes and procedures to maintain your data consistency.

#### Virtual Workshop & Data Cleanup Support

Celero consultants review your current business processes, procedures and data quality and complete thorough current environment analysis and identification of areas of improvement.
